

ZZ Plant Care Guide

Light

Bright, indirect light is ideal;
Tolerates lower light conditions

Watering

Let the soil dry out between waterings;
Too much water can lead to root rot

Fertilizer

Feed twice in spring and summer;
Don't fertilize in fall and winter

Soil

Use well-draining soil;
Be sure pot has a drainage hole

Temperature

Likes warm indoor environments:
60°F to 75°F (15°C to 24°C)

Repotting

Repot when roots/ rhizomes fill the soil;
Use a pot one size larger

Pruning

Lightly prune to manages the size;
Cut stems close to the soil

Toxicity

Toxic to cats and dogs;
Keep away from pets that like to chew
