

Pothos Plant Care Tips

Sunlight - Bright, indirect light
Tolerates lower light conditions

Soil - Well-draining potting mix
Pot must have drainage hole

Watering - Water when the top
1-2 inches of soil is dry.

Fertilizing - Feed with a balanced
plant fertilizer in spring & summer

Temperature - Likes warm rooms
65–85°F / 18–30°C

Pruning - Trim leggy vines to
encourage a bushy plant

Repotting - When roots fill the pot
move to a pot 1-2 inches larger

Pet safety - Toxic to dogs and cats
Keep out of the reach of pets
