

Gloxinia Plant Care

Light

Bright, indirect light;
An east-facing window is ideal

Watering

Water when the soil just starts to dry;
Use room-temperature water, not cold

Fertilizer

Feed every 2-4 weeks in spring/summer;
Don't fertilize during dormancy

Soil

Use well-draining soil;
Be sure pot has a drainage hole

Temperature

Likes warm indoor environments:
65°F to 75°F (18°C to 24°C)

Humidity

Gloxinias love moderate humidity;
Use an indoor humidifier to add moisture.

Repotting

Repot every 2-3 years;
Check the tubers for damage or rot

Toxicity

Gloxinias are not toxic to cats, dogs,
or humans.
